This event is free and open to public.
Sound/Image

The exhibition, symposium and demos to explore the creative tension and interplay between Sound and Image. Artists engage with possible ways of narration whether guided or enhanced, altered or disrupted through the Sound/Image interface or explored solely through a sense of hearing or a sense of sight.

The Symposium Exploring the Human Sensorium through Sound/Image featuring screenings, talks and life demonstrations also opens the exhibition on Wednesday 7th December at 2 pm in Cinema. The screenings are open to public and will run 10 am – 6 pm from 7th to 11th December.

This event is organised in association with the research project, Engaging the Human Sensorium through Art and New Technologies, funded by the Great Britain Sasakawa Foundation that builds on uses of digital technologies in contemporary art, creating opportunities for new knowledge, artistic and technological exchange, featuring artists’ works and device art demos from Japan and Scotland.

The exhibition travelled from IA Gallery, Tokyo Metropolitan University and Miraikan - National Museum of Emerging Science and Innovation in Tokyo where it was showcased between 21-28 April 2016.
RE International developments in Culture and Creativity thematic area

Tokyo Metropolitan University and UWS MCS MoU collaboration and thematic developments in practice research teaching based on curated projects
