AZIMUTH:
SOUND/IMAGE

21 APRIL TO 28 APRIL 2016
AZIMUTH: SOUND/IMAGE

The exhibition explores the creative tension and interplay between Sound and Image. The works showcased engage with possible ways of narration whether guided or enhanced, altered or disrupted through the Sound/Image interface or explored solely through a sense of hearing or a sense of sight.

The exhibition is presented at Tokyo Metropolitan University (21.4.16-28.4.16) and Miraikan - National Museum of Emerging Science and Innovation (22.4.16-24.4.16) at north-eastern angle where some of the works were made - at the point where a vertical circle projected through an astronomical object intersects the horizon from the angle measured from its northern origin - the University of West of Scotland.
